INTO THE TOWN OF PRAIRIE CITY RODE THE BANDITS, ROBBING THE BANK, LEAVING DEATH AND SUFFERING IN THEIR WAKE... SO SUDDENLY, THAT BEWILDERED CITIZENS AND LAWMEN ALIKE COULD REMEMBER ONLY A GLARING FLASH OF GUNFIRE, AND A MIXED CLOUD OF DUST AND GUNSMOKE...

AT THAT MOMENT, RIDING TOWARD TOWN, WERE JESSE JAMES AND HIS ELDER BROTHER, FRANK...

MIGHTY PEACEFUL, THIS PRAIRIE CITY, FRANK. SEEMS LIKE A MAN COULD HOLE UP IN IT, AND MAYBE RELAX.

# DANIEL BOONE— ADVENTURER

Driving in the direction of Frankfort, Kentucky, you will come upon a great monument erected for a great man. The letters on this massive piece of marble say; DANIEL BOONE Born 1734, Died 1820. As your memory goes back into the archives of history, your heart will swell with pride as you reflect upon Daniel Boone, the early American who through endless sacrifices and love of country, paved the way for you children to travel without danger.

Daniel Boone was born in Penna., 8 miles from Reading which is today a thriving, modern American City. His father was Devonshire English and was called Squire Boone—Squire being a name and not a title. His mother's name was Morgan, of Welsh extraction. Both sides of his family were Quakers, brought to Pennsylvania by the fame of William Penn and his Quaker associates.

Daniel Boone had ten brothers and sisters. One was killed by Indians, the others lived to ages ranging from eighty three to ninety-one. Their stay in Pennsylvania was short. Rumors reached them of a new country to the South that was a paradise of game and a land of rich soil. When Daniel was seventeen the Boone family moved to Yadkin County in North Carolina. This is in the northwestern part of the state on the eastern slope of the Blue Ridge Mountains. At that time it was virgin territory, filled with game. Although young Daniel was still a farmer he spent as much time with his rifle as he did with his hoe. Not only did they have to hunt for all of their food but their clothing came from the wild animals they hunted. Of all the hunters Boone was the most noted for his marksmanship. As he grew to manhood, the Indians gave the Western frontiersmen a great deal of trouble.

General Braddock came from Virginia with an army of British and Colonials to drive the intruders out. Braddock was brave but inexperienced in savage fighting. A young Virginian named George Washington who was in command of the Colonials tried to show him

the danger but there was no time for the British to learn.

One day as their little army was marching in single file along a narrow trail a few miles from Fort Duquesne, the Indians attacked. From both sides of the ravine of death, the Indians poured their fire. The British were able to take it for a while but were outnumbered and many fell in the line of duty. George Washington and the Colonials seeing how the British were endangered, leaped into the woods and fought the Indians in Indian fashion, saving a great number of their men. Braddock could not be saved and died with his soldiers.

Daniel Boone was with the outfit, not as scout or fighting man, but as wagoner at the rear. When the battle started Boone mounted his horse and galloped out of danger leaving the fighting men to their own resources. There was one good thing that grew out of that inglorious battle with Braddock—to wit, Boone's meeting with John Finley, who was also a hunter, Indian trader, peddler and wanderer. Finley never tired of telling Boone about the great herds of Buffalo, elk and wild turkeys that were awaiting a hunter such as he in Kentucky. Boone's mouth watered as his finger itched to gee at the trigger of his rifle.

The path over the mountain was rough, unknown and also dangerous because the Southern Cherokee Indians claimed it as their country and the Shawnees of the North, as theirs. These Indian tribes raided back and forth and across it by turns.

It was in September 1773 that Boone started on his most serious invasion of Kentucky. He was the head of a large caravan including five other families, which accompanied the Boones as they advanced through Cumberland Gap.

Boone sent his son James and two other men to get extra supplies at the Russel settlement on Clinch River. The party lost their way. Some Shawnees on their way North from a raid in the Cherokee country attacked them at dawn and killed young Boone. It was heart-

## COWBOY WESTERN COMICS

breaking news the little party brought back to Boone but he took the blow like a genuine frontiersman. True to his motto—then as always, he told his group to “press on.”

When Richard Henderson dreamed his dream of an independent colony beyond the Alleghenies, it was natural that he should turn to Boone as his pathfinder. Boone thought that now his star was finally shining. The tour promised him wealth and power but in the end brought him only heartbreak and disappointment.

The land they set out to seek was claimed by Virginia on the basis of the original grants from the British crown. North Carolina, too, had a claim for part of it on the same basis. The original land grants were vague in their descriptions of the land between points on the coast, westward to the Pacific.

In view of these conditions, and since neither Virginia nor North Carolina had done anything to make good their claims, there was some reason for Henderson's argument that the only good title rested on Indian treaties. He proceeded with the formation of the Transylvania Company and entered into a treaty with the Cherokees, who were the native owners of the country around Sycamore Shoals. One of the Indian chiefs made a remark to Boone that he was to remember all of his life. “Brother, it is a fine land we sell to you but I fear you will find it hard to hold.” This was in 1775 and Indians wars were almost continuous from then until the end of the Revolution in 1783. Boone built a trail from the Valley of Virginia to Central Kentucky. He did this while fighting off Indians, but finally it was accomplished.

It was a hard country through which the Wilderness Road ran but over it was to pass one of the greatest migrations in the history of inland America. There were forty “guns” in the road company and it was a difficult task for axes and guns. All travel was horseback in those days. In fact it was not until 1796 that a wheel passed over this great highway, although thousands of settlers had used it by that time.

This indeed was the Promised Land and through discouraging and heartbreaking days they struggled on, eager to live in the new settlement, overlooking the hard conditions of living. They were 200 miles from the nearest white settlement. Boone held his position firm and built a stockade at Otter Creek and the Kentucky River that became known as “Boone's borough.” No trace of this settlement remains today.

In 1776 Kentucky became a county of Virginia and Richard Henderson received a grant of two hundred thousand acres of land in consideration of forfeiting his claim. In the same Fall came the long Indian war which lasted as long as the Revolution.

In 1777 Boonesborough was attacked 3 times. Those were dangerous days. It was a time when white men kept their scalps only at the price of courage and supreme woodcraft. They had to beat the Indians at their own game and many used their scalping knives as freely as their red enemies.

In 1778, while Boone was leading his men to seek out the Indians there was an attack on the settlement. The Indians captured Boone, whom they all feared. The victorious Indians set out for their camps on the little Miami River, a few miles from the present town of Xenia, Ohio. Boone was held there by the Indians for nearly five months, occasionally hearing plans and rumors of attacks on the whites. The biggest attack was to be against Boonesborough and Boone had to act quickly. The next day he secured permission to go on a hunt. He took a direct line for the Ohio, travelling day and night. Indians were all about and it was unsafe to build a fire or to shoot game. For three days he ate nothing but the parched corn he carried in his hunting pouch.

It was a trip that held horrors every hour. Not only was Boone compelled to travel at top speed, but he had to conceal his trail by doubling in his tracks. When he arrived in Boonesborough he found his family had given him up for dead. He came back to constant fighting with the Indians who spared neither sex nor age in their zeal for white annihilation. It was through courage and heartbreak at the loss of his loved ones that Boone built the Highway to the West, which was known as Boone's Road.

In his eighty-seventh year Boone was still fighting the Indians when the end came on September 21, 1820. His body, with that of his wife now rests in Frankfort, Kentucky.

So we bid Good-bye to the simple honesty that was Boone's and his steadfast cheerfulness when the going grew hard. His faith in all men and his dream of Kentucky have made his name remembered, while other contemporary names grow dim with the years.

Boone stands on the heights, as the Great American Frontiersman, the man who made the vast Western wilderness a safe road for all of us to travel.
